

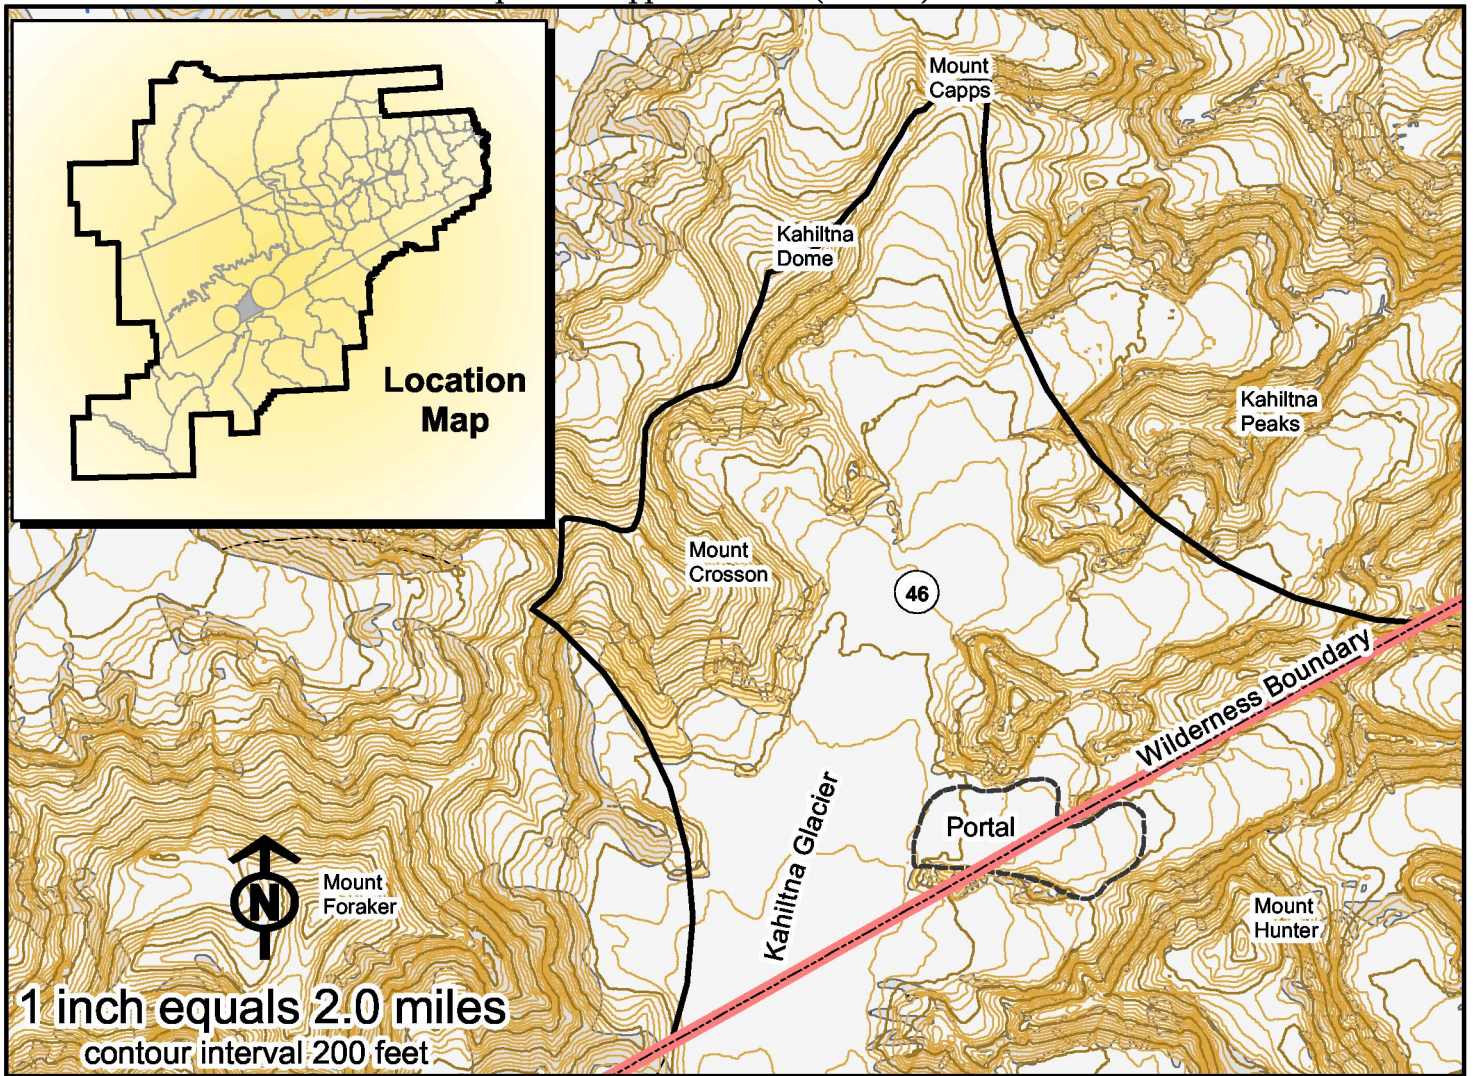

## Map 2-35 - Upper Kahiltna (Unit 46)

Upper Kahiltna (Unit 46)

Predominately snow and ice. An outstanding scenic area between the two dominant peaks of the Alaska Range.

The West Buttress is the most popular climbing route on Mount McKinley. Regular climbing and mountaineering use throughout this unit, including an increase in day use. Frequent overflights. Wilderness experience very poor during main climbing season, excellent in off-season.
